

MADHUSMITA SHIAL

Full Stack Developer | React.js | Node.js / Express.js | REST APIs | SQL & NoSQL

+91 8114788283 | madhusmitabarsa19@gmail.com | Bengaluru | github.com/Madhu2003smita

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive React.js and React Native front-ends and Node.js/Express.js and NestJS REST APIs backed by PostgreSQL (relational) and MongoDB (NoSQL). Experienced in relational schema design, migrations and query optimization, API design and integration, JWT authentication, and Git-based collaborative workflows with CI/CD and Docker. Comfortable working in agile teams, debugging production issues, and delivering maintainable, well-structured code.

TECHNICAL SKILLS

Frontend: HTML5 | CSS3 | JavaScript (ES6+) | TypeScript | React.js | React Native | Next.js | Tailwind CSS | Context API | Responsive UI

Backend: Node.js | Express.js | NestJS | Java | Spring Boot | .NET | ASP.NET Core | REST API Design & Integration | JWT Authentication | WebSockets | Microservices

Database: SQL | PostgreSQL (schema design, migrations, query optimization) | TypeORM | MongoDB (NoSQL) | Redis

Version Control & DevOps: Git | GitHub | Docker | CI/CD | Postman | Linux | VS Code

AI/LLM: LLM API Integration | Prompt Design | Structured Outputs | AI Agents | Multi-Agent Systems

Languages: JavaScript | TypeScript | C# | Python | SQL

PROFESSIONAL EXPERIENCE

Software Developer | PearlThoughts

Jul 2026 – Present

- Contribute to backend feature development in an agile team, from implementation through testing, debugging, and maintenance.
- Troubleshoot and resolve application issues while collaborating closely with team members on assigned tasks.
- Apply backend technologies and team development practices to deliver reliable, maintainable features.
- Collaborated with team members to complete assigned project tasks and application updates.

Backend Developer | Must Fintech

Aug 2025 – Mar 2026

- Developed scalable Node.js/NestJS backend services with a modular, maintainable architecture.
- Designed and implemented RESTful APIs with JWT authentication, input validation, and structured error handling.
- Designed data models and optimized queries across PostgreSQL (relational) and MongoDB (NoSQL).
- Troubleshoot and resolved API and data-layer performance bottlenecks to improve application responsiveness.
- Collaborated with frontend and deployment teams in an agile environment to deliver production-ready features on schedule.

Frontend & Mobile Intern | Ladybird Web Solution Pvt. Ltd.

Jun 2024 – Sep 2024

- Built cross-platform mobile components using React Native, contributing directly to mobile application features.
- Developed responsive web features using HTML, CSS, and JavaScript alongside mobile development work.
- Integrated RESTful APIs for frontend and backend data communication across web and mobile surfaces.
- Used Context API for frontend state management in component-driven applications.
- Assisted with debugging, testing, and performance improvements following structured development practices.

SELECTED PROJECTS

Task Management System | React.js, Node.js, JWT

- Developed a full-stack task management application with JWT authentication and CRUD operations.
- Built a responsive React.js interface for managing and organizing tasks with filtering and prioritization.

GitHub: github.com/Madhu2003smita/task-app

SUT Price & System Settings API | NestJS, TypeScript, PostgreSQL, TypeORM, Zod

- Developed REST APIs for SUT pricing and system configuration using NestJS and TypeScript.
- Implemented PostgreSQL persistence with TypeORM entities, repositories, migrations, and upsert operations.
- Added Zod-based request validation and date/time parsing for API inputs.
- Implemented configurable system settings with database-backed values and fallback handling.
- Structured the application using NestJS modules, controllers, services, repositories, and dependency injection.

AI Agent Run Panel | React.js, Multi-Agent Systems

- Built a real-time React.js interface for visualizing multi-agent system activity and live streaming outputs.
- Implemented task lifecycle tracking for parallel execution, failures, retries, and cancellations.
- Implemented event-driven UI behavior for displaying real-time task updates.

GitHub: github.com/Madhu2003smita/agent-run-panel

Real-Time Chat Application | Node.js, WebSockets

- Built a real-time messaging application using WebSockets for low-latency, bidirectional communication.
- Designed a scalable backend architecture to support efficient real-time communication.

EDUCATION

B.Tech in Computer Science | Gandhi Institute of Excellent Technocrats, Bhubaneswar | 2020 – 2024 | 7.85 / 10

Class XII, CBSE | Sulagna Higher Secondary School, Balasore | 2018 – 2020 | 61%

CERTIFICATIONS

- MERN Stack Development
- AI Generative Model Workshop
