Programming: JavaScript, TypeScript, Python, C#, SQL

PROFESSIONAL EXPERIENCE

Software Developer | PearlThoughts | Jul 2026 – Present

- Contribute to backend feature development in an Agile team, from implementation through testing, debugging, and maintenance.
- Troubleshoot application issues and collaborate with team members to deliver reliable, maintainable features.
- Support assigned project tasks and application updates using established team development practices.

Backend Developer | Must Fintech | Aug 2025 – Mar 2026

- Developed modular Node.js/NestJS backend services and RESTful APIs with JWT authentication, input validation, and structured error handling.
- Designed data models and optimized queries across PostgreSQL and MongoDB.
- Resolved API and data-layer performance bottlenecks and collaborated with frontend and deployment teams.

Frontend & Mobile Intern | Ladybird Web Solution Pvt. Ltd. | Jun 2024 – Sep 2024

- Built cross-platform mobile components using React Native and developed responsive web features using HTML, CSS, and JavaScript.
- Integrated REST APIs and used Context API for frontend state management.
- Assisted with debugging, testing, and performance improvements.

SELECTED PROJECTS

CareerAI – AI Resume Analyzer & Job Matcher | React.js, Node.js, Express.js, Python, FastAPI, SQLite

- Built a career-assistance application that extracts resume skills and education from PDF files and compares candidate profiles with job descriptions.
- Implemented job-match scoring, missing-skill insights, resume customization, editable resume sections, and ATS-friendly PDF generation.

AI Agent Run Panel | React.js, Multi-Agent Systems

- Built a real-time interface to visualize multi-agent activity and live streaming outputs, including task execution states, failures, retries, and cancellations.
- GitHub: github.com/Madhu2003smita/agent-run-panel

Task Management System | React.js, Node.js, JWT

- Developed a full-stack task management application with JWT authentication, CRUD operations, filtering, prioritization, and a responsive React interface.
- GitHub: github.com/Madhu2003smita/task-app

Real-Time Chat Application | Node.js, WebSockets

- Built a real-time messaging application using WebSockets for low-latency, bidirectional communication.
